Natural Sustainable Innovative

50 Year Partnership with the Cosmetic Industry

Inspiring Trustworthy Competent

About Lipoid Kosmetik

Lipoid Kosmetik is a leading manufacturer of natural raw materials for the cosmetic and personal care industry. High-quality botanical actives and extracts (Lipoid Kosmetik AG, Switzerland) as well as pharma grade natural lecithins and phospholipids (Lipoid GmbH, Germany) are part of our sophisticated portfolio. As a pioneer in these fields, Lipoid Kosmetik has gained an outstanding reputation in the global cosmetic industry over the last 50 years. This long-standing expertise, in combination with the exceptional quality of our portfolio, enables our customers to develop innovative, functional and natural cosmetic products meeting the highest standards.

Expertise

The Swiss-based Lipoid Kosmetik AG has been manufacturing high-quality botanical extracts since 1972.

Research & Development

We develop innovative products and customized solutions in close cooperation with our partners.

Quality

Our quality system meets the highest standards set by the regulatory authorities and the cosmetic industry, Cosmetics GMP ISO 22716:2007 and ISO 9001:2015.

Regulatory

We assure the compliance of our products to national and international regulations and provide superior regulatory support to our customers.

Naturalness

We put great emphasis on natural and organic ingredients, and provide a multitude of COSMOS-approved and COSMOS-certified products. Moreover, we quantify the grade of naturalness of our products based on the ISO 16128 guidelines.

In addition, Lipoid Kosmetik is certified according to the RSPO Supply Chain Standard, Mass Balance. Check our progress at www.rspo.org

Sustainability

Lipoid Kosmetik is committed to the principles of sustainability, social responsibility and environmental protection. The efforts are continuously refined and documented in our Sustainability Report. We have been awarded several times for our outstanding performance on all CSR aspects by EcoVadis, being among the top 1% of all companies assessed.

If you are interested in our second product line, please discover our Phospholipids Catalog by Lipoid GmbH, Germany.

Cucumber	Kale	Potentilla	Yarrow

... and many more

Our Extraction Technology

Phytochemical Expertise

According to our long-standing expertise with a plethora of plant extracts and actives, we are firmly convinced that valuable cosmetic effects are mainly the result of a combined action of multiple plant substances. We thus provide 'full-spectrum extracts' aiming to concentrate all solvent-soluble molecules rather than merely concentrating a few particular metabolites. Our extraction processes respect the importance of a phytochemical diversity and are designed to maintain the phytochemical composition in all its variety.

Full-Spectrum Mild Extraction

- Unique combination of energy-efficient, environment-friendly maceration and percolation techniques.
- Extremely mild process that allows to extract temperature-sensitive, value-giving constituents without undesired by-products such as colorings. This offers stable extracts, optimally balanced for extraction yield and formulation acceptance.
- Our manufacturing procedures are controlled under cosmetic GMP regulation ISO 22716, including very tight raw material specifications and an electronically controlled extraction system, allowing us to produce consistent extracts with very low batch-to-batch variation.

Manufacturing of botanicals in Steinhausen, Switzerland
